

# **How many energy storage and new energy companies are there in Ukraine**

## Overview

---

How many solar power plants were installed in Ukraine in 2023?

As of early 2024, renewable energy capacity stood at 8.7 GW. Despite the war's challenges, in 2023, DTEK Networks connected over 1,400 new RES facilities to the system, commissioning 182.3 MW of wind and approximately 500 MW of solar power plants. In 2023, Ukrainian businesses invested around USD 150 mln in solar energy.

Does Ukraine have a solar power plant?

Ukraine's annual solar energy volume is higher than that of Germany, one of the industry leaders. From 2018 to 2020, solar energy capacity increased nearly fivefold. As of 2024, solar power plants account for about 75% of "green" energy production in Ukraine (excluding large hydropower plants).

What is the energy sector like in Ukraine?

The energy sector in Ukraine and the world operates in a dynamic environment and responds to both internal and external challenges. In recent years, Ukraine has focused on diversifying its generation sources, developing renewable energy sources, reducing dependence on imported energy resources, especially gas, and improving energy efficiency.

Why is Ukraine investing €140 million in energy storage?

The €140 million total investment aims to enhance power grid stability, bolstering Ukraine's energy security and independence. The project will be the biggest operational energy storage portfolio in Eastern Europe at the time of commissioning.

How much money does Ukraine need to invest in energy?

Volodymyr Kudrytskyi, Chairman of the Board of Ukrenergo, has noted that Ukraine will need to invest around USD 15 billion to increase the capacity and flexibility of its energy system in the coming years.

## How vulnerable is Ukraine's energy sector in 2023?

According to an assessment conducted by the United Nations Development Program (UNDP), the state of Ukraine's energy sector remains extremely vulnerable in 2023 due to prolonged attacks. The situation with the energy system: Ukraine's energy system keeps operating in emergency mode with limited safety margins, facing losses.

## Home Energy Storage (Stackble system)

### Product Introduction

- Scalable from 10 kWh to 50 kWh
- Self-Consumption Optimization
- Integrated with Inverter to avoid the Compatibility problem
- LFP battery, safest and long cycle life
- Stackble design for easily installation
- Capable of High-Powered Emergency-Backup and Off-Grid Function
