# How many kilowatt-hours of electricity can a portable power bank store

## Overview

---

How much energy can a portable power station store?

Voltage (V) denotes the electrical force, or potential difference, of the battery. Consider a power station with a battery capacity of 50Ah and a voltage of 12V. Using the calculator, the energy capacity would be: Thus, the portable power station can store up to 600 watt-hours of energy.

How many watts can a power bank deliver?

$Wh = (10,000mAh / 1000) * 3.7V = 37Wh$  In this example, the power bank has a Wh capacity of 37Wh. This means it can deliver 37 watts of power for one hour or a proportionate amount of power over a longer period of time. Calculating the Wh capacity helps you understand how much energy the power bank can store and provide to your devices.

How much power does a power station need?

This formula calculates the minimum capacity (in Wh) your power station needs to deliver enough power to the devices over the specified runtime.  
Example 1: "You need a power station with at least 705.88 Wh capacity.  
Example 2: "You need a power station with at least 1466.67 Wh capacity.

How to choose a portable power station?

The next step is to consider the capacity of the portable power station. The capacity of the power station will determine how long it can run your devices. Capacity is measured in watt-hours (Wh) and indicates how much electricity the portable power station can store.

What is a portable power station size calculator?

This Portable Power Station Size Calculator is a simple yet powerful tool that helps you determine the ideal power station capacity for your needs. By inputting your devices' total power consumption, desired runtime, and power station efficiency, you'll get an accurate estimate of the required capacity in

Watt-Hours (Wh).

What is the capacity of a power bank?

The capacity of a power bank is measured in milliampere-hours (mAh) and represents the amount of charge it can hold. The higher the mAh rating, the more charge the power bank can store, and thus, the more times it can recharge your devices.
