

**SolarGrid Energy Solutions**

# **How many watts does RV solar power require**

## Overview

---

Add a buffer of 30-50%, and you'll want a 200-250 watt panel setup. Is a 400 watt solar panel enough for RV?

For most minimal to moderate setups—yes. How many watts a day do RV solar panels use?

We tend to hover right around 2 kWh (2,000 watt hours) per day for two adults. When scoping out your RV solar setup, the logical place to start is with the panels. The capacity of a solar panel is measured in watts, with the advertised number of watts being the amount of power you can pull in during perfect conditions.

Are solar panels good for RVs?

It's become increasingly popular with campers, and especially RV travelers. Not only is it "Green" but modern solar panels are also efficient enough to reduce or sometimes eliminate an RV's need for a traditional gasoline or diesel-powered generator. This might leave you wondering, just how much solar power do I need to power my RV?

How much solar power does a travel trailer need?

An average travel trailer need 120 Amp Hours of solar power, whereas a luxury fifth wheel or Class A motorhome might need 240 to 360 Amp Hours of solar power to truly maintain its arsenal of appliances and creature comforts. So, this wide range will influence just how long it takes for you to see a full return on your initial investment.

How many solar panels do I need for my RV?

The answer is as unique as fingerprints. Determining how many solar panels you need for your RV depends on your daily electrical usage. One key factor you need to understand is that your solar panels do not run anything in your

RV. What they actually do is recharge your house batteries.

How much solar power does a motorhome need?

If you have a large Class A motorhome, your solar demand in a day might be as high as 240 to maybe even 360 amp-hours of power. Yet a smaller travel trailer, with modest appliances, energy-efficient LED lights, and mindful habits, might be able to live comfortably on 100 to 120 amp hours of green solar power.

Do you need solar power for your RV?

You are dealing with electricity and you are going to be drilling into your RV's shell. The good thing about solar power is that there isn't much maintenance required. The panels are built to take road conditions and there are not any moving parts that wear down.
