How much would a rooftop solar system cost without Bess?

Without BESS, the same household could install 10 kW of rooftop solar, which would cost \$28,700 and save \$1,567 per year. PGE and the state of Oregon both offer incentives for rooftop solar and battery energy storage. With the utility, state, and federal incentives, the combined solar and BESS system could be paid back within 11 years.

Are rooftop solar panels or battery energy storage systems worth the cost?

Pacific Northwest National Laboratory (PNNL) researchers are here to help. Homeowners must navigate a quagmire of complicated policies to determine whether the energy savings from rooftop solar panels or battery energy storage systems (BESS) are worth the high upfront cost.

How much does a rooftop solar system cost in Washington?

A 7.5 kW rooftop solar system plus a 13.5 kWh BESS would cost \$46,322 on average in Washington to install without incentives. The state's largest utility, Puget Sound Energy (PSE), offers a TOU rate option, meaning prices are higher in the evenings and lower overnight, in the early morning, and on weekends.

How much would a solar system cost without Bess?

Without BESS, the same household could install 10 kW of rooftop solar, which would cost \$29,200 and save \$1,357 per year. Without financial incentives, the payback period for the rooftop solar and BESS would be around 28 years, but with the Investment Tax Credit it's brought down to 20 years.

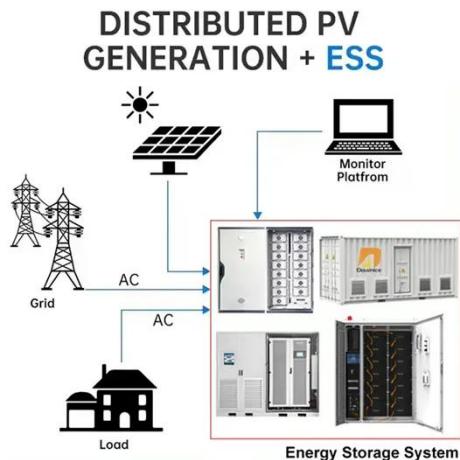

Is there a guide to rooftop solar & Bess?

To help homeowners tackle this tangle of information, PNNL researchers Jessica Kerby and Bethel Tarekegne published an open-access guide to rooftop solar and BESS in *Renewable Energy Focus*.

## How much does a Bess battery cost?

Factoring in these costs from the beginning ensures there are no unexpected expenses when the battery reaches the end of its useful life. To better understand BESS costs, it's useful to look at the cost per kilowatt-hour (kWh) stored. As of recent data, the average cost of a BESS is approximately \$400-\$600 per kWh. Here's a simple breakdown:
