## Overview

---

Is TP-Link a good wireless base station?

TP-LINK's 5GHz 300Mbps \* Outdoor Wireless Base Station is specifically designed to provide an effective solution for outdoor wireless networking applications. With its centralized management platform and high degree of flexibility, it is the ideal choice for providing point-to-point, point-to-multipoint, and outdoor Wi-Fi coverage.

What is a wireless base station?

With the help of the system, a wireless base station is an example of an access point that acts between a wireless node and with other wired PCs and peripherals. A device that is placed between network segments (or "subnets") to ensure that traffic is properly routed between different subnets.

Can the wbs510 be paired with a TP-Link dish antenna?

Where long-distance wireless data transmission is necessary, the WBS510 can be paired with a TP-LINK dish antenna, allowing it to transfer data over distances of up to 50 km \*. Pharos Base Stations work seamlessly with TP-LINK dish and sector antennas to provide efficient PtP and PtMP data transmission.

What makes the Pharos series a good base station?

To maximize performance and stabilize long distance wireless transmission, the Pharos Series is built with Qualcomm Atheros enterprise level chipsets, high gain-antennas, and high-power amplifiers. In addition to excellent internal components, Pharos Series Base Stations also feature specially designed, weatherproof enclosures and PoE capability.
