How to connect external devices to the base station power cabinet

Overview

Can I use a third-party power adapter with the base station?

The base station should be used with Yealink original power adapter (5V/600mA) only. Using a third-party power adapter may cause damage to the base station. Connect the Ethernet cable between the Internet port on the base station and an available port on the in-line power switch/hub.

How do I connect external antennas?

Connect external antennas. antenna antenna bracket lock nut. INSTALLATION GUIDE IP-DECT Base Station and IP-DECT Gateway Installation of the Base Station 3.2.6 Secure the Cable For safety reasons secure the base station cable to a convenient point at about 30 cm from the base station.

How do I connect a base station to an external reference?

If an external reference is required, enable the external reference “Absent” alarm (Configure > Alarms > Control). Use a 50: coaxial cable (RG58 or RG223) to connect the external reference to the base station’s external reference frequency input. You can daisy-chain up to eight base stations using F-junctions.

How do I connect a PC to a base station?

Remove the local area Ethernet connection and connect an Ethernet patch cable between the PC and the base station. You can use either straight through or crossover Ethernet patch cable with the current base station firmware. Click Start > Settings > Control Panel. Double-click Network Connections.

How to connect a base station to an in-line power switch/hub?

To connect a base station to an in-line power switch/hub, connect the Ethernet cable between the Internet port on the base station and an available port on the switch/hub. Note: If the power is provided in-line, you don’t need to

connect the AC adapter. Make sure the switch/hub is PoE compliant.

How do I install the IP-DECT base station?

INSTALLATION GUIDE IP-DECT Base Station and IP-DECT Gateway Installation of the Base Station 3.2.6 Secure the Cable For safety reasons secure the base station cable to a convenient point at about 30 cm from the base station. If for some reason the base station drops, it is secured by the cable.
