How to make a power strip site with battery cabinet

Overview

How do you use a power strip?

On top of the shelf is a basket with your power strip, which is plugged into the wall. Place your devices inside the cubes with the chargers, which are fed behind the shelf and up to the basket. The cubes without holes can be used as a place to store your devices when you're not using them.

How do you put a power strip in a dock?

The power strip is going to be placed inside the box, with the cord feeding through the hole on the side of your dock. Plug your chargers into the power strip, and feed the cords through the holes at the top, with your devices resting on top of the box.

How do you put a charging station on a wall?

The cord of the charger is hidden inside the charging station, and it is also fed through a hole at the bottom, so it can be plugged into the wall. Use circular pads to raise the station and create room for the cord. You can use a sander and stain to give your charging station a sleek or textured look.

How do you mount a Ryobi charger to a wall?

In fact, the Ryobi charger was so close to the top that I just sent the wire in over the top. Make a hole in the side of the cabinet. This is where the power strip plug will exit to be plugged into the wall. There are multiple ways you can mount the charging station to the wall: Use a screw through the back into a stud. Using a French cleat.

How does a battery shelf work?

The shelf is actually a box with a door on it for hiding your power strip. The cord to the power strip is fed through a hole at the bottom of the box, and the charger cord is fed through a semi-circle at the top. Your device is going to rest on top of the box as it's charging.

How do you charge a suitcase with a power strip?

Start by turning the inside of the lid into a space for your chargers. Use the top drawer to hide your power strip, and feed the cord through a hole in the back of the box to an outlet. Store your devices on the top surface of the box. A suitcase charging station like this one by designsponge is a unique but effective way to charge your devices.
