How to start the base station power module

Overview

How to install a battery module?

1. Mark the mounting holes for the wall-mounting base and battery modules.
4. Drill holes and install expansion bolts. 2. Drill holes and install expansion bolts. 3. Install the wall-mounting base. Two persons are required to move a module. Battery modules must be secured to the wall.

How do I activate/power the wes3 base station unit?

To activate/power on the WES3 Base Station unit, hold down 'A' and press 'B' three times in quick succession. All three LEDs will illuminate and then the amber LED will flash. Initial setup of the WES3 Base Station is through a series of on-screen options. Language, Inspection Delay and Pre-Alarm mode options can be configured.

How do you ground a power module?

Inappropriate grounding may cause device damage and personal injury. Connect the ground point of the power module to the ground bar, and then connect equipotential cables between modules. In capacity expansion scenarios, cascading cables at the lower part must be routed from the rear of the product.

How do I connect a power module?

Connect cables in accordance with local installation laws and regulations. Before connecting cables, ensure that the DC SWITCH on the power module and all the switches connected to the power module are set to OFF. Otherwise, the high voltage of the system may result in electric shocks. Do not touch the manual ON/OFF switch when installing cables.

What is a power module?

A power module consists of a power unit and a monitoring unit. The power unit is responsible for energy access and conversion. The monitoring unit is

responsible for power signal access and monitoring management of PV, grid power, genset power, and batteries. Connect to a genset and control genset startup and shutdown signals .

How long does it take to power on a power module?

Tighten the screws. The product must be powered on within 24 hours after being unpacked. During maintenance, the power-off time cannot exceed 24 hours. Before the first power-on, press the manual ON/OFF switch. Set the DC SWITCH of the power module and the AC input switch to ON.
