

## Overview

---

The solar photovoltaic (PV) is one way of utilising incident solar radiation to produce electricity without carbon dioxide (CO<sub>2</sub>) emission. It's important here to give a general overview of the present situation o.

Can solar PV be used in Libya?

The potential and opportunities for solar PV in Libya have been assessed. Future prospective of exploiting solar PV has been drawn in Libya. The solar photovoltaic (PV) is one way of utilising incident solar radiation to produce electricity without carbon dioxide (CO<sub>2</sub>) emission.

How many solar panels will be used in Libya?

According to the Renewable Energy Authority of Libya that about 1.2 million solar panels will be used in the project to generate up 152 TWh per year. It is planned that the implementation of the strategic project to reach 25 percent of the generation capacity during the year 2022 .

Is solar energy available in Libya?

Solar energy by far is the most available in Libya as the average sunlight hours is about 3200 hours/year and the average solar radiation is approximately 6 kwh/m<sup>2</sup>/day. This paper aims mainly to discuss the feasibility of solar energy in Libya, a brief overview of solar global jobs and the global cost of PV systems during the last decade.

What is the largest solar project in Libya?

Sadada area is about 280 km south east of Tripoli . This plant will be the largest solar project in Libya with the latest technological application in the field of solar energy. According to the Renewable Energy Authority of Libya that about 1.2 million solar panels will be used in the project to generate up 152 TWh per year.

When did solar PV systems start in Libya?

In 2003 the installation of solar PV systems to some rural areas started in

Libya . The installation was achieved by the Centre of Solar Energy studies (CSES) and General Electricity Company of Libya (GECOL) with a total power of around 345 KWp. PV systems supplied villages, isolated houses, police stations and street lighting areas .

Does a 50 MW solar PV-Grid work in Libya?

A study performed by (Aldali and Ahwide, 2013) proposed analysis of installing a 50 MW solar photovoltaic power plant PV-grid connected with a tracking system in Libya. Solar PV modules of 200 W are used in that study due to its high conversion efficiency.
