Should you buy an isolated power supply for medical use?

And this is why, when you're buying an isolated power supply (IPS) intended for medical use, it is vitally important you make an informed and careful choice. At UPS Systems plc, we have an extensive selection of IPS units to ensure that in the event of an emergency, patients and staff in group 2 medical locations will be provided with power.

What is hospital isolated power systems equipment?

Hospital isolated power systems equipment is suitable for hospital operating rooms and ICU (CCU) intensive care units, and can provide safe, continuous and reliable isolated power supply for hospital.

What happens if hospital isolation panel equipment is powered off?

Once the hospital isolation panel equipment is powered off, it will also threaten the lives of patients. Therefore, the electrical design of hospital isolated power systems for the special place of medical treatment should be carried out in strict accordance with national standards and regulations.

Why are medical uninterruptible power supplies important?

Medical Uninterruptible Power Supplies are essential devices to avoid blackouts and voltage surges in healthcare facilities. They ensure high levels of safety and reliability even in the most critical contexts and comply with current regulations in the healthcare sector.

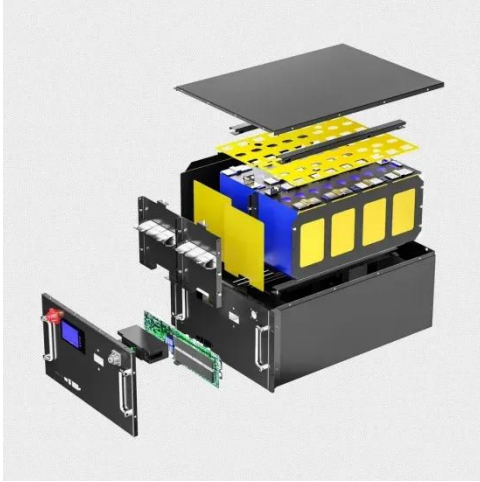

Do you need an uninterruptible power supply (UPS) for electro-medical use?

It's even a legal requirement. The demands of an uninterruptible power supply (UPS) for electro-medical use are considerable and the units we have for this purpose are all designed to work in conjunction with your isolated power supply to keep the power on at critical moments.

What are the best uninterruptible power supplies?

UPS Systems plc offers a wide range of uninterruptible power supplies including those from Riello UPS, APC UPS and Eaton UPS as well as the UPS battery packs designed to go with them.
