# Installation of photovoltaic glass tiles on sloping roofs

## Overview

What is a fully integrated photovoltaic roof?

Figure 1. Fully integrated photovoltaic (PV) roof “RIS.” The solutions that have been proven fall into the following categories: Interlocking panel systems, which either use panels that mimic roofing tiles with the photovoltaic (PV) element embedded in the surface or have a frame bonded to the PV panel which provides the sealing interlock.

Can a PV tile be used with a slate roof?

The use of tiles or slates frequently requires special tiles for edges, angled valleys, chimney joins, ridges, etc. and slates are generally cut to shape on site, and nail holes made to suit. This implies that the PV tile must link seamlessly into the standard roofing material ( Fig. 3 ). Figure 3. Photovoltaic (PV)-Slate “traditional” system. 1.2.

Can a PV system be used on a roof?

Most types of roof have been used with a PV system at some time. The overall construction must be capable of taking the additional load of the PV (or indeed survive the additional uplift when the PV replaces a much heavier roof surface such as concrete tiles).

Should PV panels be over-roof mounted?

The over-roof mounting of PV panels has been the normal practice in many installations. It is simple in concept, and has been proven provided that the attachment through the traditional roof is performed well.

Does a PV roof have a glass external surface?

The external surface will have to resist degradation from UV, wind, and rain for 30–60 years. This can be achieved for roofs with traditional materials, but is hard to demonstrate for new materials. Hence most PV on roofs has a glass external surface. 1.7.1. Sublayer membranes.

## What is a PV roof?

PV slates and shingles are a more unusual product, but a niche market has developed for aesthetic PV roofs. The advantage of using a traditionally mounted roof product is that normal building trade practice can be used, and there is little resistance to the concept from the naturally conservative building trade.
