Is Phnom Penh s outdoor power supply good and how much does it cost

Overview

How much does electricity cost in Cambodia?

Electricity prices in Cambodia are among the highest in the region, topping USD 0.137 per kWh. This is considerably more than neighbouring countries. The price of electricity in Cambodia not only impacts the competitiveness of Cambodian industries but also limits access to reliable power for a significant segment of the population.

Is electricity reliable in Phnom Penh?

Power in provincial cities is more expensive and less reliable than the supply in Phnom Penh. In very remote rural areas, the only source of electricity may be a small portable generator.

Why are electricity prices so high in Cambodia?

The high electricity cost for consumers results from the quantity of imported energy and the outdated energy grid. Electricity prices in Cambodia are among the highest in the region, topping USD 0.137 per kWh. This is considerably more than neighbouring countries.

Does Cambodia buy electricity from neighboring countries?

In addition to local power generation, Cambodia also buys electricity from neighboring countries, especially during the dry season. In 2022, Cambodia's total installed capacity amounted to 4,495 megawatts (MW), while 1,030 MW of power was imported from Thailand, Vietnam, and Laos.

What is Cambodia's electricity supply?

The composition of Cambodia's electricity supply is a blend of domestic production and international imports. In 2022, over 25% of the country's energy was imported from Thailand, Laos and Vietnam. Due to the country's high reliance on hydropower, power demand typically outstrips domestic supply during the dry season.

How can Cambodia reduce its electricity demand & supply gap?

First, Cambodia's existing electricity demand and supply gap need to shrink. One of the main ways the country can achieve this is to reduce the rapidly increasing demand for energy. The country's National Energy Efficiency Policy 2022-2030 aims to decrease Cambodia's final electricity consumption by 19% in 2030.
