**Is it okay to put a battery cabinet in the office**

## Overview

---

Do battery cabinets need to be locked?

Battery cabinets must enclose the batteries behind locked doors accessible only to authorized personnel. As long as the cabinets are kept locked, they can be located in a computer room or other rooms accessible by non-battery technicians.

What is a battery cabinet?

The battery cabinet is a unique sort of safety cabinet intended for use with rechargeable batteries. As the use of batteries in the workplace has increased in recent years, so has the popularity of weatherproof battery box, which offer numerous safety benefits. The key risks associated include:

Why do you need a battery cabinet?

Ease of use is one of the principle selling points for battery cabinets. It is convenient to service the equipment when the UPS and the battery (ies) are right next to each other. Conversely, it is inconvenient to have to go to a separate room when open-rack batteries are installed.

Should you put safety warnings on a battery cabinet?

By encouraging careful handling and storage, a battery cabinet can reduce these dangers. Battery cabinets should be prominently labeled with appropriate safety warnings. Putting cautionary labels on your cabinet draws attention to the potentially harmful contents inside, both to employees and emergency personnel.

Can you put a battery in an electrical room?

Local or regional codes may dictate whether batteries are permitted in an electrical room. Smaller UPS systems (e.g, up to 250 kVA) are commonly installed directly in the computer room along with their respective battery cabinets. The UPS and/or battery cabinets might be configured to look like

standard computer equipment racks.

What are the OSHA requirements for battery storage cabinets?

OSHA also mandates that these cabinets be clearly and properly labeled, alerting workers to potential hazards and promoting safe handling practices. It's also essential to keep the storage area clean and well-organized, placing batteries in a way that prevents accidental tipping.
