

**SolarGrid Energy Solutions**

# **Is the outdoor power supply safe**

## Overview

---

Are outdoor power outlets safe?

Yes, in many ways, outdoor power outlets are just as safe as the ones inside. However, those outlets must be National Electrical Code (NEC)-compliant and include a weatherproof encasing. Still, the outlet is only as safe as the appliance that you plug into it, so be sure those are safe for outdoor use as well.

What is an outdoor Uninterruptible Power Supply?

An outdoor Uninterruptible Power Supply is a power solution designed for critical applications where it's essential that equipment stays running in harsh outdoor environments and significant temperature variations, where an ordinary UPS would fail. Trust TSi Power for these applications.

Can a PVC cable be used outdoors?

Standard twin and earth PVC cables aren't suitable for permanent use outdoors. The sheath of this cable (grey or white) has limited resistance to UV radiation, but isn't specifically designed for installation in direct sunlight or outdoors.

Should a garden circuit be IP66 protected?

For sockets and switches, IP66 is a prudent minimum. This means they're protected against dust, any possibility of contact and powerful jets of water. Sockets should have integral 30mA RCD protection or be on an RCD/ RCBO protected circuit. It's not recommended to take the garden circuit off an existing circuit through a fused spur.

What electrical equipment should be used for a pond?

Electrical equipment for use with ponds and water features should be IPX7 or higher. Pumps should comply with BS EN 60335-2-41:2003+A2:2010 and ground recess lighting with BS EN 60598-2-13:2006+A2:2016. Larger ponds

may be subject to Section 702 of BS 7671, as above.

Should power and lighting cables be buried in ducting?

To avoid damage from rodents and accidental damage, cables for power and lighting should be either armoured and/or buried in a suitably robust ducting. Oversizing ducting will make cable pulling easier and allow for future-proofing, to the extent of laying extra cable that can extend a scheme later.

## Is the outdoor power supply safe

---

### Outdoor power - the safety requirements

Jul 17, 2020 · Scott Brewer, Head of Technical at Knightsbridge, looks at some key safety considerations when it comes to providing power and light ...
