Is there any export tariff on energy storage batteries in Bucharest

Overview

Will China impose tariffs on lithium-ion EV batteries?

An interesting issue will be the imposition of tariffs. There are existing tariffs pursuant to Section 301 of the Trade Act of 1974 on some Chinese-origin lithium-ion EV batteries and non-lithium-ion battery parts, which were increased to 25% in September 2024.

Are Chinese tariffs affecting battery energy storage systems?

If you're in the business of battery energy storage systems (BESS), you've probably felt the squeeze of tariffs on Chinese imports. For years, China has been a go-to for affordable, high-capacity energy storage solutions, but ongoing trade policies and tariffs have made importing these systems into the U.S. more complicated — and expensive.

How does tariff risk affect a battery energy storage system (BESS) project?

Mitigating tariff risk in battery energy storage system (BESS) projects is crucial for ensuring project financial viability, as tariff changes can significantly affect cost structures and overall project economics.

How will Section 301 tariffs affect Bess batteries?

The biggest impact comes from Section 301 tariffs, which add 25% to the cost of many battery components. Here's the rundown: As of March 22, 2025, BESS manufactured in China and shipped to the U.S. faces a tariff rate that's already a bit of a gut punch.

When will Chinese-origin lithium-ion non-EV batteries be taxed?

Tariffs on Chinese-origin lithium-ion non-EV batteries are scheduled to increase to 25% effective January 1, 2026. Otherwise, batteries of non-Chinese origin storage batteries have not been subject to multi-front targeted tariff or duty actions.

Will US tariffs affect energy storage?

There have also been indications that the US administration may consider other tariff proposals impacting energy storage, such as a 10–20% universal tariff, tariffs of up to 60% across the board on Chinese-origin goods, and tariffs of 25% on Mexican and Canadian origin goods.
