Islamabad communication base station inverter construction approval

Overview

How long does it take to build a substation in Islamabad?

The project aims to be completed by August 31, 2026, within a 32-month timeframe. The project's objective is to install a 765/500/220/132 kV Substation at Islamabad West, along with associated transmission lines, to meet the increasing power demands of areas under the jurisdiction of the Islamabad Electric Supply Company (IESCO).

What is Islamabad West Substation project?

The proposed project Islamabad West Substation will enhance the capacity of transmission system and ensure uninterrupted power to its consumers.

Will Islamabad West substation be operational by 2026?

ISLAMABAD - The capital city of Islamabad is expected to have the Islamabad West Substation operational by 2026, enhancing the transmission system's capacity and ensuring uninterrupted power supply to consumers.

What is IESCO's 765/500/220/132 kV substation initiative?

The primary objective of the initiative is to establish a 765/500/220/132 kV Substation at Islamabad West, accompanied by interconnected transmission lines. This strategic move seeks to meet the escalating power demands within the jurisdiction of the Islamabad Electric Supply Company (IESCO).

What is an anti-islanding enabled inverter?

Anti-islanding is an in built feature in inverter which trips the flow of energy to the grid on grid failure. Installing an anti-islanding enabled inverter is mandatory by the Regulation for Net Metering.

How do you secure a PV module to an inverter?

The PV module cables should be properly secured using proper sized ties, not

tied with metal wire or ordinary string. Current carrying cable from PV modules to inverter should be DC cable of proper rating, separate colors to identify plus/minus and in UPVC conduit NOT normal PVC conduit.
