

# **Israel LNG energy storage project**

## Overview

---

Will Israel build its first large-scale energy storage project?

JERUSALEM, May 2 (Reuters) - Israel's Energy Ministry said on Tuesday that it was moving forward with a plan to build the country's first large-scale energy storage project.

Why does Israel need LNG?

Israel's demand for imported LNG began in 2011 following the disruption of Egyptian supplied gas and the depletion of the offshore Yam Tethys reservoir. The country, however, began moving to develop its domestic reserves after 2011. Israel's known gas reserves were 30 trillion cubic feet.

Will Israel build a floating liquefied natural gas facility?

In March 2024, Israel's Minister of Energy and Infrastructure "instructed an examination to be conducted of the options for building a floating liquefied natural gas (FLNG) facility in Israel's economic waters," to provide an additional route for the country's LNG exports.

Can Israel become a gas exporter?

Delek is developing the basin offshore Israel, which has estimated resources of 21.3 trillion cubic feet (Tcf). It's a joint venture with U.S. independent producer Noble Energy (39.66%) and Israeli firm Ratio Energy (15%). The project will allow Israel to become a gas exporter, according to researchers.

Does Israel use natural gas?

As of 2017 natural gas provided 70% of Israel's electric power. Most of it was imported, particularly from Egypt, through the Arish-Ashkelon pipeline. Israel's demand for imported LNG began in 2011 following the disruption of Egyptian supplied gas and the depletion of the offshore Yam Tethys reservoir.

Which countries import LNG by tanker?

Countries in one the most gas rich regions import LNG by tanker. They include Mina Al-Ahmadi LNG Terminal in Kuwait in 2009, Jebel Ali FLNG Terminal in Dubai in 2010, Hadera LNG Terminal in Israel in 2013, Jordan through Aqaba Jordan LNG Terminal in 2015, Ruwais LNG Terminal in Abu Dhabi in 2016.
