# **Italian photovoltaic energy storage 15kw inverter**

## Overview

---

What is a Solis hybrid 15kW inverter?

The SOLIS Hybrid 15kW Inverter is an advanced solution for three-phase energy storage systems, offering industry-leading power and efficiency. It combines the ability to handle critical loads and extend backup duration during power outages with exceptional flexibility in integration with high power PV modules and 48V batteries.

What is a power inverter & how does it work?

It combines the ability to handle critical loads and extend backup duration during power outages with exceptional flexibility in integration with high power PV modules and 48V batteries. With an efficiency of up to 97.6%, this inverter optimizes the utilization of energy generated and stored.

How many MPPTs can a solar power system support?

Boasting a maximum charge/discharge current of 70A+70A across two independently controlled battery ports, it has four integrated MPPTs with a string current capacity of up to 20A, ensuring unmatched power delivery. It supports six parallel PV+ energy storage systems with a maximum of 180kW.
