## Overview

---

What are supercapacitors & EDLC?

Supercapacitors, also known as ultracapacitors and electric double layer capacitors (EDLC), are capacitors with capacitance values greater than any other capacitor type available today. Supercapacitors are breakthrough energy storage and delivery devices that offer millions of times more capacitance than traditional capacitors.

Where can I buy 10 F supercapacitors / ultracapacitor?

Tariff may apply to this part if shipping to the United States. Tariff may apply to this part if shipping to the United States. 10 F Supercapacitors / Ultracapacitors are available at Mouser Electronics. Mouser offers inventory, pricing, & datasheets for 10 F Supercapacitors / Ultracapacitors.

What are supercapacitors based on?

Supercapacitors are based on a carbon technology. The carbon technology used in these capacitors creates a very large surface area with an extremely small separation distance.

How long does a super capacitor last?

The life of supercapacitors will double for every 10°C decrease in temperature or voltage by 0.1V. Supercapacitors operated at room temperature can have life expectancies of several years compared to operating the capacitors at their maximum rated temperature. L1= Load life rating of the super capacitor (typically 1000 hours at rated temperature).

Can a supercapacitor be used as a primary power source?

Supercapacitor solutions are sized to provide the appropriate amount of ride through time until the primary backup power source becomes available. For applications requiring power for only short periods of time or is acceptable to allow short charging time before use, supercapacitors can be used as the

primary power source.

Are supercapacitors suitable for pulse power applications?

Supercapacitors are ideally suited for pulse power applications, due to the fact the energy storage is not a chemical reaction, the charge/discharge behavior of the supercapacitor is efficient. Supercapacitors are utilized as temporary energy sources in many applications where immediate power availability may be interrupted.

## Jamaica Super Farad Capacitor
