Juba Uninterruptible Power Supply Plant

Overview

What happened to Juba power plant in South Sudan?

Juba power plant in South Sudan is set to cease its operations following a notice issued by Ezra Construction and Development Group (ECDG), which generates and supplies Juba city with electricity.

What is the near-term supply prospect for power supply in Juba?

The near term supply prospect for power supply in the Juba distribution area is based on the 40MW hydropower plant at Fula Rapids. As an emergency measure to rehabilitate the existing network and to absorb the possible supply from the Fula Rapids power, immediate investment is required.

How much power can a 20MW solar plant produce in Juba?

The 20MW solar plant can generate sufficient power to supply electricity to up to 16,000 households in Juba, significantly reducing energy costs and bolstering grid reliability, said the project's developer.

Who financed the Juba electricity project?

The Bank funded the USD 38 million expansion and rehabilitation of the electricity distribution network in Juba. The project was primarily financed through a grant. It was implemented by the South Sudan Electricity Corporation, which is the power utility created by the Government.

Why did Ezra shut down its Juba power plant?

Ezra said in a statement that it will cease operating its power plant in the next few days, in pursuit of delayed US Dollars payment from the government of South Sudan. "Ezra Construction and Development Group (ECDG), hereby gives notice that the Juba power plant will cease to operate in the next few days.

What is a solar power plant in South Sudan?

Image: The recently launched 20MW solar energy plant in South Sudan.
Credit: Ezra Group A public-private partnership in South Sudan has launched the country's first major solar power plant and Battery Energy Storage System (BESS) in the capital Juba, where it is expected to provide electricity to thousands of homes.
