# **Kathmandu Energy Storage Power Station**

## Overview

---

When will Nepal's largest energy storage project be completed?

The project said the overall construction is set to be completed by May 2026. The project will be one of Nepal's biggest storage-type projects, with an estimated annual energy generation capacity of 587.7 GWh for the first 10 years and 489.9 GWh from the 11th year. During the dry season, the project can generate energy for six hours daily.

How many storage projects are there in Nepal?

Nepal has only two storage projects—Kulekhani I (60 MW) and Kulekhani II (32 MW). The project, which will be Nepal's third storage type, is 150 km west of Kathmandu on the Seti river near Damauli in the Tanahun district. Shyamji Bhandari, project chief, said grouting is being done in the lower level area of the main dam under package 1.

How much does the Nepal Electricity Project cost?

The government and the Nepal Electricity Authority will use their money to build the infrastructure during pre-construction. The project is estimated to cost \$505 million, and the Nepal government will contribute \$86 million.

Where is Tanahu Hydropower Project located?

The project, which will be Nepal's third storage type, is 150 km west of Kathmandu on the Seti River near Damauli in the Tanahun district. Post Photo The 140-megawatt Tanahu hydropower project in the Tanahun district has achieved 63 percent physical progress, raising hopes of power production by its stipulated completion deadline of May 2026.

How many kV lines have been constructed in Tanahun District?

A 33 kV line has been constructed to supply electricity to the substations. The project said that distribution transformers of different capacities have been installed, and 11 kV lines have been constructed in various places to make the

electricity supply of Tanahun district sufficient, reliable and of good quality.
