Can a solar PV system provide electricity access in remote areas?

Isolated and Mini-Grid Solar PV Systems: An Alternative Solution for Providing Electricity Access in Remote Areas (Case Study from Nepal) Sol. Energy. Storage. Elsevier. Ltd. ( 2015), pp. 359 - 374, 10.1016/B978-0-12-409540-3.00015-3 Mohammed, A.A. 2018. Evaluation of potentials for renewable energy in the power system in Sudan.

Does Nigeria have a solar PV system?

Statistical and economic analysis of solar radiation and climatic data for the development of solar PV system in Nigeria Energy. Reports, 6 ( 2020), pp. 309 - 316, 10.1016/j.egy.2019.08.061 Design of a hybrid solar photovoltaic system for Gollis University's administrative block, Somaliland.

Do PGF values change if a solar system is installed in Sudan?

It is a rule of thumb that PGF values change according to the season and location of the city or country in question (Mainali and Dhital, 2015 ). Hence, a predetermination of this factor is a must if detailed engineering designs of solar PV systems around the wide-ranging land of Sudan are required. Eq.

What is the corresponding factor value for solar irradiance in Sudan?

In the literature, the corresponding factor value is 4.8, illustrated in Sudan's PV potential map, based on historical long-term solar irradiance satellite records. Consequently, a 16.67% Percent Error between the two values is present due to the big difference in data amount, favoring the literature.
