## Overview

---

Does Kingston support a long-duration energy storage project?

This article was published more than 6 months ago. Some information may no longer be current As an active participant in Ontario's energy transition, Utilities Kingston is supporting a long-duration energy storage project that would store electricity to be used in meeting peak demand.

Could Kingston store electricity to meet peak demand?

NAPANEE — Utilities Kingston is supporting a project that could provide a way to store electricity to be used to meet peak demand. This advertisement has not loaded yet, but your article continues below. Subscribe now to read the latest news in your community.

What is advanced compressed air energy storage?

Activate your Online Access Now The Advanced Compressed Air Energy Storage is being proposed as part of the Quinte Energy Storage Centre near the Lennox Generating Station west of the city. The project promises to store 500 megawatts of electricity for use during peak demand.

Should Kingston's Public Utility be involved?

The project is being characterized as a regional asset with economic benefits for all of eastern Ontario and David Fell, the president and chief executive officer of Utilities Kingston, said it was a project that Kingston's public utility should be involved in.

Why should you choose Kingston midstream?

At Kingston Midstream, we are committed to the responsible and safe storage and transportation of one of the world's most vital commodities.

What is Quinte energy storage centre (qesc)?

We are proud to be a partner on the proposed Quinte Energy Storage Centre (QESC), that would contribute 500 MW of capacity and eight hours of storage for continuous discharge into the provincial grid.
