

**SolarGrid Energy Solutions**

# **Lithium battery pack foreign trade**

## Overview

---

Which countries import lithium-ion batteries?

Lithium-ion batteries power various technologies, from smartphones to electric vehicles and grid storage. China dominates the global lithium battery supply chain, producing over 75% of the world's lithium-ion battery cells. The U.S. imports nearly 70% of its lithium batteries from China, making tariffs on these products highly impactful.

How to import lithium batteries from China?

For cost-effective shipping, plan your lithium battery imports in advance and choose the best shipping method based on urgency and budget. By understanding the logistics requirements, packaging regulations, and cost factors, businesses can import lithium batteries from China efficiently while ensuring full compliance with international trade laws.

Are lithium batteries safe to ship from China?

With China being the world's largest producer of lithium batteries, businesses worldwide rely on Chinese suppliers for cost-effective, high-quality battery solutions. However, importing and shipping lithium batteries from China comes with strict international regulations due to their classification as hazardous materials.

What is the US tariff policy on lithium ion batteries?

In April 2025, the U.S. government updated its tariff policy on lithium-ion batteries imported from China. The current tariff structure includes: A 3.4% global tariff on lithium-ion batteries, regardless of origin. A Section 301 tariff targeting Chinese imports, currently at 7.5%, is scheduled to rise to 25% by January 2026.

Why is China exporting lithium batteries in 2022?

The sustained high growth of new energy vehicle exports has driven the

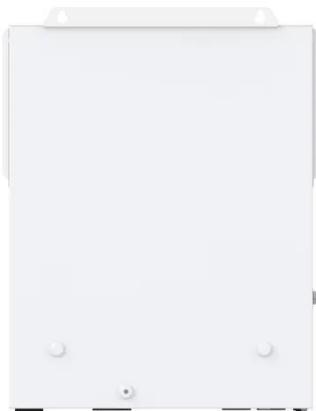

export of lithium batteries. According to data from the Ministry of Industry and Information Technology, China's total lithium battery exports in 2022 reached CNY 342.656 billion , an 86.7% year-on-year increase.

Do countries impose export restrictions on lithium?

To give domestic companies a competitive edge, nations often impose export restrictions on raw materials such as lithium, cobalt, and nickel. This is particularly true with a few of the world's biggest lithium-producing nations, such as China, certain countries in Africa, and Chile.
