Lithium iron phosphate battery energy storage container in Mumbai India

Overview

Are lithium-ion batteries the future of energy storage?

Among the numerous energy storage technologies existing, lithium-ion batteries are anticipated to lead the market during the upcoming decade. A lithium-ion battery pack is a rechargeable energy storage system known for its high energy density, long cycle life, and low self-discharge rate.

What are lithium ion batteries?

Lithium-ion batteries are systems for storing electrochemical energy using lithium-ions as the charge carrier between electrodes. Several factors, such as cost, energy density, cycle life, and required charging rate, influence the choice of chemistry for a specific application.
