

SolarGrid Energy Solutions

Lome Solar Air-conditioned RV

Overview

Solar energy is often touted as a “unending power source,” the reality of harnessing solar power is still a bit complicated. Since you’re here researching solar power for your RV, I’m assuming you already.

Can solar power an RV air conditioner?

For RV owners, installing a solar panel on your RV roof is a great way to reduce your energy costs and increase your ability to live off-the-grid. But can solar power really generate enough wattage to power large appliances like your RV air conditioner?

So can you power an RV air conditioner with solar?

.

How much solar power does an RV AC use?

The average RV air conditioner is rated at 13500 or 15000 BTUs and consumes 1 to 1.5 kWh of energy per hour of run time. To offset this amount of energy consumption, you would need 200 to 300 Watts of solar power, and that’s just to run the AC for 1 hour.

Do I need a solar panel for my RV?

At minimum, you have the solar panels themselves and a collection of batteries (often known as a ‘battery bank’) that provides power directly to all of your RV’s 12-volt DC electronics. In order to power any 120-volt AC electronics, like your air conditioner, you’ll need to install an inverter as well.

How much energy does an RV AC use?

The air conditioner consumes about 1.2 kWh of energy per hour. The air conditioner is left on for 3 hours a day. The RV will be parked in Moab, Utah. With these assumptions in mind, the following are the size of the components necessary to run this AC: At least 615 Watts of solar panels. 4 Lithium batteries, each rated at 100AH.

Can air conditioners run on solar?

Although air conditioners consume A LOT of energy, you can still run them on solar. However, to make this as inexpensive as possible, some optimization will be required.

Should you install a solar panel on an off-grid RV?

For off-grid RV living, however, a solar panel installation can help you avoid burning through gallons of fuel running your generator all night or finding your batteries completely depleted when you finally decide to “re-enter” civilization.
