Luxembourg new energy battery storage box

Overview

What is a battery storage project?

Positioned near an Elia high-voltage substation, this project marks a key milestone in Belgium's energy transition and electricity storage infrastructure development. Battery storage projects address the increasing flexibility demands driven by renewable energy development.

Why do we need battery storage?

Battery storage projects address the increasing flexibility demands driven by renewable energy development. They help stabilize grid balance by managing the fluctuations of renewable energy, offering a more cost-effective and reactive solution compared to conventional gas-based flexibility sources, which are expensive and highly CO2-emitting.

How many lithium-ion batteries will be in Aubange Park?

The Aubange park will include 70 lithium-ion battery containers, each with 3.8 MWh capacity. Construction has started, with commissioning expected in autumn 2026. Enecowill will manage the park's flexible capacity distribution across various markets.
