

# **Malawi cylindrical lithium battery environmental protection**

## Overview

---

How effective is environmental management in Malawi?

A journey toward more effective environmental management Malawi is ranked 128 out of 180 countries by the 2018 Environmental Performance Index (EPI).<sup>56</sup> The EPI scores countries on 24 performance indicators across 10 categories that cover 'environmental health' and 'ecosystem vitality'.<sup>57</sup> Malawi's EPI scorecard is shown in Figure 1.

How effective is water management in Malawi?

The effectiveness of water management also has a strong impact on human health. Solid and liquid waste management is often overlooked as an environmental challenge in Malawi. It is an issue of growing concern and one that will become more significant with increasing urbanization. Household air pollution (HAP) is also reviewed.

Is e-waste management a problem in Malawi?

For example, Malawi Communications Regulatory Authority (MACRA) is developing regulations on e-waste management. In the context of an already limited service provision for solid and liquid waste, Malawi also faces a future challenge regarding pressures caused by urbanization.

Is Environmental Protection a long-term objective in Malawi?

Environmental protection is enshrined in the Constitution and quoted as a long-term objective in Malawi's Vision 2020 document. In addition, recent legislation has been enacted to further strengthen environmental management and protection. However, the ability to implement policy and legislation, both nationally and locally, is weak.

Are lithium-ion batteries causing fires in waste management?

This report was written to explore the growing number of fires caused by lithium-ion batteries (LIBs) in the waste management process.

## How much does solid waste management cost in Malawi?

There has been no detailed analysis of the costs of Malawi's current solid waste management status. However, the lack of effective waste management systems does mean the cost of upgrading and improving Malawi's solid waste management will be imposed onto future generations.
