Manila donates photovoltaic containers

Overview

How will the PPA reduce plastic waste in the Philippines?

Last September, the PPA entered into a Memorandum of Understanding with the World Wide Fund for Nature (WWF) Philippines to reduce plastic wastes initially involving three ports, Manila North Harbor, Batangas Port, and the Cagayan de Oro port. This project is set to be launched within the first quarter of 2022.

What is decarbonization in Manila?

Major international gateways like the Manila International Container Terminal (MICT) and Manila South Harbor (MSH) are spearheading decarbonization projects. MICT, for instance, targets a 26% reduction in greenhouse gas emissions per container move by 2030, aiming for net-zero emissions by 2050.

Where is SM Prime putting solar panels in the Philippines?

The largest installation is at SM City Santa Rosa. With a total of 96,000 solar panels across malls in Luzon and Visayas, SM Prime holds the Philippines' largest solar energy portfolio, covering around 33 hectares. These efforts are a vital part of the company's Net Zero by 2040 strategy, aimed at reducing its carbon footprint.

When will a new recycling unit be operational in the Philippines?

These two new recycling units will be operational within a few weeks, to coincide with the vessel's scheduled stopovers in the Philippines in November and December 2024. This initiative, set up on a tight deadline, is made possible thanks to the essential support of a local partner such as DELFINGEN.

Can micro-factories add value to waste in Cebu & Manila?

This new challenge aims to add value to waste on the island by setting up two

recycling micro-factories in Cebu and Manila. The two containers will house the machines necessary to transform plastic waste into new materials or objects. These micro-factories are local, practical solutions for innovative and decentralized waste management.

Can SM North EDSA produce solar energy in 2024?

In 2024, Manila experienced around 4,440 hours of daylight, which translates to a significant potential for solar energy production. SM North EDSA is operational with a 1.5MWp solar energy system since 2014. SM Prime recognized this potential early on.

Manila donates photovoltaic containers

Philippines

Jun 17, 2025 · News from the photovoltaic and storage industry: market trends, technological advancements, expert commentary, and more.

Chevron Philippines Inc. donates solar panels to ...

Jan 25, 2024 · Chevron Philippines Inc. and SasonbiSolar have worked on a similar project in the past involving the funding and installation of solar PV ...

ICTSI donates P350m to fight virus outbreak

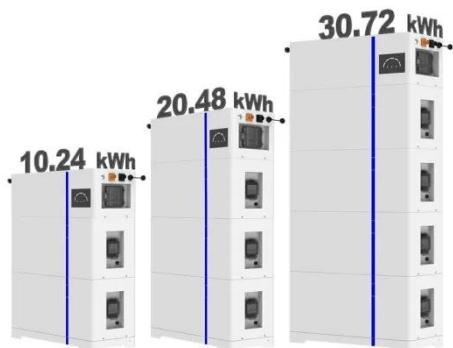

Apr 24, 2020 · International Container Terminal Services Inc. has contributed about P350 million to national and local government agencies, immediate communities, employees and port ...
