

## SolarGrid Energy Solutions

# Marseille Communications 5g base station partner

### WORKING PRINCIPLE

## Overview

---

Who built the new 5G mmWave base station?

We joint hands with Baicells, a global provider of advanced cloud architecture communication solutions and innovative O-RAN architecture for 5G base stations, to build the new launched innovative 5G mmWave base station.

Why do mobile network service providers need a 5G network?

As 5G infrastructure gradually scales up, mobile network service providers face the pressure to iterate and update their 5G technology and infrastructure as well. In response, a large bandwidth and low latency are key for supporting the increasing demands on capacity, transmission rates, and differentiated applications of mobile network.

What is 5G CPE?

With 5G CPE, more end-point devices (e.g., cell phones, tablets and computers) can access the Internet with high speed. As 5G signal coverage expands across more areas and the deployment of 5G infrastructure picks up speed, we can expect a growing demand for 5G CPE too. Recently, we launched Makrolon® RE material solution.
