

**SolarGrid Energy Solutions**

# **Middle East Energy Storage Pumping Photovoltaic Power Station**

## Overview

---

What is the potential for energy storage in the Middle East?

There is increasing high-level interest in the potential for energy storage in the Middle East, with grid-connected systems forecast to reach 1.8GW in the region by 2025, according to I.H.S Markit.

How much energy storage will the Middle East have by 2025?

“We are seeing that total deployment, the overall installed base by 2025 in the Middle East region, is going to reach around 1.8GW of grid-connected energy storage,” Jansen said. “With a lot of that growth, to caveat, it’s going to be seen more towards the end of the period.

What is energy storage system deployment in MENA?

Energy Storage System deployment in MENA Energy Storage Systems (ESS) play a critical role in the integration of VRE into the power grid, as these systems manage the intermittencies of renewable energy resources and mitigate potential power supply disruptions.

Which energy storage technology has the most installed capacity in MENA?

Pumped hydro storage (PHS) has the largest share of installed capacity in MENA at 55%, as compared to a global share of 90%. Pumped hydro storage is one of the oldest energy storage technologies, which explains its dominance in the global ESS market.

Which energy storage solutions will be the leading energy storage solution in MENA?

Electrochemical storage (batteries) will be the leading energy storage solution in MENA in the short to medium terms, led by sodium-sulfur (NaS) and lithium-ion (Li-Ion) batteries.

How much does a solar PV project cost in Saudi Arabia?

In Saudi Arabia, each of the two awarded rounds of the Renewable Energy Project Development Office (REPDO) auctions, totaling 2.17 GW, in addition to the PIF-led projects, has received record-low prices. The 300 MW Sakkaka solar PV project, the first project under REPDO, set a record tarif of 1.34 USD cents/kWh in February 2018.

systems into the power grid, which in turn ...

### Home Energy Storage (Stackable system)

High Efficiency    Easy installation    Safe and Reliable    Perfect Compatibility

#### Product Introduction

Scalable from 10 kWh to 50 kWh  
Self-Consumption Optimization  
Integrated with inverter to avoid the compatibility problem

LiFePO<sub>4</sub> battery, safest and long cycle life  
Stackable design, effortless installation  
Capable of High-Powered Emergency- Backup and Off-Grid Function

## WFES 2024
