Mixed power supply for base stations of Saudi Arabian telecommunications companies

Overview

Does Saudi Arabia have a 230/400 volt system?

With more than 70% of the world now using a 230/400 volt distribution system, the government approved plans in August 2010 to move the country to a 230/400 volts system. In Saudi Arabia the demand for electricity is growing faster than in any other country in the region.

Why does Saudi Arabia have a power outage?

Much of Saudi Arabia's electric power-generating capacity was built during the 1970s and 1980s and the supply often struggles to meet demand. As a result voltage fluctuations and power outages are not uncommon – especially over the peak demand summer months. Saudi Arabia is a large country with an area of 2.3 million km².

Will Saudi Arabia get a third of its electricity from solar?

At the 2012 United Nations Climate Change Conference in Qatar, Saudi Arabia announced its target is to receive a third of its electricity demand from solar power with 41GW of solar capacity, by 2032. At the same time, it was announced that the country intended to invest in seventeen new nuclear reactors over the next 20 years.

How will Elsewedy Electric KSA improve Riyadh's power supply network?

As part of this endeavor, ELSEWEDY ELECTRIC KSA will connect the new Riyadh 110/13.8 kV Substation, which will strengthen Riyadh's power supply network. In addition, the project will offer backup feeding for HP2 and KZM BSPs in Jeddah, ensuring higher resilience and reliability for the region's industrial zones.

Why is Elsewedy Cables KSA expanding its manufacturing operations in Saudi Arabia?

By expanding its manufacturing operations in Saudi Arabia, Elsewedy Cables

KSA reinforces its position as a prominent player in the kingdom's electrical industry and demonstrates its unwavering dedication to supporting Saudi Arabia's Vision 2030 objectives.

Does Saudi Arabia need electricity?

In Saudi Arabia the demand for electricity is growing faster than in any other country in the region. Because of air-conditioning needs, electricity demand in the summer is around 40% higher than in the winter months. Base-load and peak-load demand differ widely between day and night.
