# Mobile container power generation system

## Overview

---

Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.

What is a mobile power station?

The MOBIPOWER is the silent solution for your remote power needs at construction job sites, off-grid camps, or other applications. Whereas, diesel generators require with fuel and are noisy, this mobile power station uses solar energy with no noise pollution.

What is a solar power generator?

A silent, worry-free alternative to loud and dirty diesel generators to meet high off-grid power needs using solar power generation – with optional wind turbine (s) for augmented power generation day and night. Harvested power stored in a choice of batteries including Lithium Ion, EV Second Life Batteries, and deep-cycle AGM batteries.

What is mobipower & how does it work?

The MOBIPOWER, more than anything else, is a green power station focusing on using renewable sources of energy at all times, and by doing so, this energy container will produce almost 90% less CO<sub>2</sub> and other greenhouse gasses compare to a generator only power station.
