# Mobile power cell 21700

## Overview

---

Why is a 21700 cell a good choice?

The larger size of the 21700 cell enables it to store more energy, making it ideal for applications requiring high power capacity, such as electric vehicles and industrial battery packs. Its dimensions also contribute to better thermal management, ensuring safer and more efficient operation.

What is a 21700 battery?

The 21700 battery is a cylindrical lithium-ion battery with a diameter of 21mm and a length of 70mm. It offers a nominal voltage of 3.7V and a capacity of up to 5,000mAh, making it a powerful and efficient energy source. Its energy density ranges between 250 Wh/kg and 300 Wh/kg, depending on the chemistry.

What is a voltaplex 21700 battery?

Voltaplex offers 21700 batteries built for high-capacity systems that require consistent output and extended runtime. Applications like power tools, mobility platforms, and storage applications use these Li-ion cells specifically for their consistently reliable performance.

How big is a 21700 cell?

The 21700 cell stands out due to its standardized dimensions of 21mm in diameter and 70mm in length. These measurements make it larger than the widely used 18650 cell, which measures 18mm by 65mm. This increase in size allows the 21700 to deliver higher energy storage and improved performance.

Are 21700 batteries bigger than 18650?

21700 batteries are larger and offer higher capacity than 18650 cells, which allows for fewer cells per pack and increased runtime in high-demand systems. Do 21700 battery cells require specific holders or enclosures?

Yes. Due to their size, 21700 battery cells must be used with holders and hardware designed specifically for the 21mm x 70mm format.

What is a 21700 Li ion cell?

21700 Li-ion cells support high energy output with stable discharge over long periods of use. Their increased cell capacity reduces the number of units needed in large builds, improving system efficiency. These cells perform well under continuous load and maintain voltage integrity across extended cycles.
