

## SolarGrid Energy Solutions

# Mobile power three-level box

## Overview

---

What is a 3 level distribution box?

The third level distribution box is the control cabinet of the electrical equipment itself. Three level distribution: distribution box is set under the general distribution box, switch box is set under the distribution box, and electrical equipment is set under the switch box to form three-level distribution.

What is three level distribution?

Three level distribution: distribution box is set under the general distribution box, switch box is set under the distribution box, and electrical equipment is set under the switch box to form three-level distribution. "Two level protection" mainly refers to the adoption of leakage protection measures.

What is a construction power distribution box?

And save wire. The first level distribution box is to introduce three-phase power supply, ground wire and zero wire from the transformer. Class I power distribution box: the construction power distribution cabinet is used for the construction power of the construction site.

What is two level protection?

"Two level protection" mainly refers to the use of leakage protection measures. In addition to installing leakage protectors in the final switch box, a first level leakage protector should also be installed in the upper level distribution box or main distribution box, forming a two-level protection overall.

What is a three-level protection system for construction electricity?

The complete set of products can form a complete three-level protection system for construction electricity, achieving the goal of one machine, one switch, and one protection, which is very suitable for various standard

engineering applications. The first level cabinet adopts bottom in and bottom out lines, with front doors open.

What is a Class I power distribution box?

Class I power distribution box: the construction power distribution cabinet is used for the construction power of the construction site. It is specially designed for the special situation of the construction site and meets the relevant construction power standards of the construction department.
