

## SolarGrid Energy Solutions

# Myanmar Lighting Solar Lights

## Overview

---

Is there a solar power system in Myanmar?

In Myanmar, there are solar-powered battery charging stations, solar lighting, solar home systems, and village solar minigrids. However, there is no data available on their overall capacity and extent.

What is Myanmar's Solar potential?

In the short- to medium-term, off-grid solar home systems and mini-grid solar / solar/hybrid projects aim to connect households in remote locations where the costs of grid access are prohibitively expensive. The Asian Development Bank estimates Myanmar's potential solar resource at 27 GW. To date, very little of this potential has been realised.

What is the IFC-LED lighting Myanmar project?

Launched in June 2016, the IFC-led Lighting Myanmar project is a key component of the Government of Myanmar's National Electrification Plan, which aims to achieve universal access to sustainable electricity services by 2030.

What will lighting Myanmar do?

The Lighting Myanmar team will conduct extensive local outreach, and will host several networking events for Associates and potential partners.

How will lighting Myanmar promote private involvement in the market?

To encourage policies that are supportive of private involvement in the market, Lighting Myanmar will engage in a dialogue with a range of government actors, as well as international donor partners, on a number of issues, including subsidies, tariffs, and quality standards.

Who is Asia Solar?

Asia Solar Co., Ltd is “The Best Solar Energy and Lighting Solution Provider” for you. Aiming to be the best in the league, we offer fair value product and will concentrate on customer relationship and also ensuring their satisfaction will always be our first priority.
