

## SolarGrid Energy Solutions

# Myanmar photovoltaic energy storage ratio

## Overview

---

What is Myanmar's Solar power potential?

Myanmar's solar power potential is estimated to total around 35 gigawatts-peak (GWp). "So far, less than 1% has been installed so there is huge solar potential," they highlighted. Very good solar potential exists in the central lowlands of Myanmar, where demand is the highest, they added.

Why is Myanmar a good place to invest in solar energy?

"Low energy access rates, high solar irradiance for most of the year, supply lagging behind the demand, [and the] high cost of electricity generation," are key factors that make Myanmar an attractive destination for solar energy investment and deployment, Richard Harrison, Smart Power Myanmar CEO, told Solar Magazine.

Is solar energy a viable option for Myanmar's off-grid area?

For the off-grid area, Myanmar has mainly emphasis on solar home system and mini-grid system to be sustainable, affordable and environmental friendly. This paper aims to describe the high potential of solar energy, current situation of solar energy implementations and the important of Renewable Energy of Myanmar respectively.

How much electricity does Myanmar produce?

Myanmar is able to produce between 2.9 gigawatts (GW) and 3.1 GW of electricity, according to media sources. Recent estimates by the World Bank forecast energy consumption in Myanmar would grow at an average 11% rate out to 2030. The World Bank also forecast that peak electricity demand would rise to 8.6 GW by 2025 and 12.6 GW by 2030.

Why is solar energy important for rural electrification in Myanmar?

Due to lack of water in summer season in Myanmar, Solar Energy will be a vital role in Electricity generation because of the high sunshine hours for that

time. Therefore, the government of Myanmar is trying to increase the utilization of solar energy for the rural electrification.

Will Myanmar achieve universal electricity access by 2030?

“Following the lifting of sanctions in 2011, Myanmar launched an ambitious investment program, with both government and private sector participation, to develop its energy infrastructure and provide universal electricity access by 2030,” the World Bank highlighted in its June 2019 Myanmar Economic Monitor.
