New Energy Battery Factory Container Base Station

Overview

What is a containerized battery energy storage system?

Our's Containerized Battery Energy Storage Systems (BESS) offer a streamlined, modular approach to energy storage. Packaged in ISO-certified containers, our Containerized BESS are quickly deployable, reducing installation time and minimizing disruption.

Where is the world's largest battery storage system located?

July 12, 2024: The first phase of China's state-owned Datang Group's new energy storage power station has been connected to the grid in Qianjiang, Hubei Provence, making it the world's largest operating sodium-ion battery storage system.

How many kilowatt-hours can a battery storage system store?

The storage system consists of 42 battery containers and 21 integrated booster and conversion machines, in addition to a 110 kV booster station. This system can store 100,000 kilowatt-hours of electricity in a single charge, releasing energy during peak demand.

What is the largest sodium ion battery storage system in the world?

This project opened on June 30, 2024, with battery cells supplied by Zhongke Haina, making it the largest sodium-ion battery energy storage system in the world. The storage system consists of 42 battery containers and 21 integrated booster and conversion machines, in addition to a 110 kV booster station.

What is CIMC Yangzhou base battery swapping station/new energy vehicle containerized power station?

CIMC Yangzhou Base Battery Swapping Station/New Energy Vehicle Containerized Power Station consists of several container modules, suitable with various brand new energy cars and battery systems, integrated with battery storage, battery charging, car moving, and internet communication

system.

Are sodium-ion batteries a viable alternative energy storage option in China?

In a bid to diversify from lithium, China has been exploring alternative energy storage technologies. Sodium-ion batteries have emerged as a promising option due to their abundant raw material, superior performance at low temperatures, better round-trip efficiency, and excellent safety.
