New Energy Storage Mergers and Acquisitions

Overview

How much money did energy storage companies make in 2022?

Corporate funding of energy storage companies exceeded US\$26 billion worldwide in 2022, a 55% jump from 2021's total US\$17 billion. Masdar acquires UK battery storage developer Arlington Energy October 26, 2022. Masdar has acquired battery storage developer Arlington Energy in a bid to expand its presence in UK and European renewables markets.

What are the most recent M&A deals involving energy companies?

Usearch found 5488 recent M&A deals involving energy companies. The most recent M&A deals within the energy industry are:

- Baker Hughes is acquiring Chart Industries.
- Hecate Holdings is acquiring Hecate Energy.
- Tamarack Valley Energy is acquiring PrivateCo.

How many battery storage M&A deals were announced in 2023?

According to Inframation, 227 battery storage M&A deals were announced in 2023, up 15.8 percent from the year before. These transactions were worth a combined US\$24.1 billion, nearly triple the value recorded in 2022. In both volume and value terms, 2023 represented a new dealmaking high for the subsector.

Who owns Blackstone battery energy storage system?

In Q4 2023, renewable energy company Octopus Investments Australia, which is majority owned by the UK-based Octopus Group, acquired the Blackstone Battery Energy Storage System. With an expected enterprise value of US\$514 million once operational, it is the largest proposed battery project in the state of Queensland.

What is the future of battery storage?

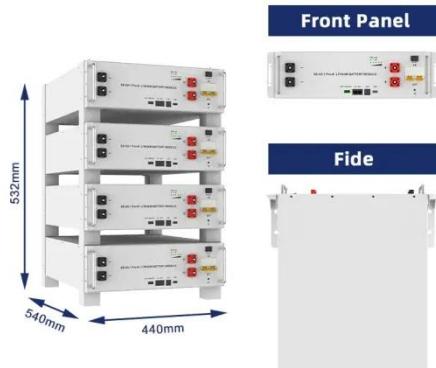

The US is leading the global race in the development of battery storage, with demand for BESS expected to increase sixfold by the end of the decade.

Capacity is expected to almost double in 2024 to more than 30 GW, as development of energy storage projects accelerates in line with the rapid growth of variable solar and wind assets.

What is a battery energy storage system?

Battery energy storage systems (BESS), which enable utility companies and grid operators to access pools of surplus renewable energy on demand that would otherwise be wasted, play a central role in the global energy transition.
