## Overview

---

What is battery management system?

Battery management system used in the field of industrial and commercial energy storage.

What are the advantages of lithium iron phosphate batteries?

Lithium iron phosphate batteries have the advantages of high safety, long life, and low cost. They have continued to make breakthroughs in energy density, safety, heat dissipation and integration convenience, and group technology. At the same time, they have greatly reduced the space and load-bearing requirements.

How many battery production lines are there in China?

The total planned investment is 0.6 billion yuan. There are 6 production lines, including three types of battery pack production lines: cylindrical, prismatic and soft package. Gradually form a battery system with an annual production capacity of 5GWh, reaching an annual production capacity of 200000 lithium batteries.
