

## SolarGrid Energy Solutions

# New solar air conditioner in Aarhus Denmark

## Overview

---

How long do solar heating systems last in Denmark?

Especially solar heating systems are of great interest. Solar heating plants for heating a whole town or a part of a town by means of a district heating system. Today simple financial payback times of solar heating systems in Denmark are 5-15 years, and merely by making technological improvements they can be halved.

How can small and medium sized solar heating systems be developed?

Research and development in the field of small and medium sized solar heating systems should concentrate on hot water tanks and interplay between solar collectors and other renewable energy sources. There is a need for prefabricated easy to install components for small systems.

Which companies are active in the European solar heating market?

A number of Danish manufacturers and companies are active on the European solar heating market. For example: Arcon-Sunmark A/S has produced large solar collector panels for most of Europe's solar heating plants. Aalborg CSP A/S is producing concentrating tracking solar collectors for solar heating plants.

Which country has the largest solar heating market in the world?

During the last years the solar heating market Worldwide has stagnated, while the Danish market has grown strongly. Denmark is the frontrunner on large solar heating plants. By the end of 2016, 80% of the solar collector area in operation in all the solar heating plants in the World were located in Denmark.

Who makes concentrating solar collectors?

For example: Arcon-Sunmark A/S has produced large solar collector panels for most of Europe's solar heating plants. Aalborg CSP A/S is producing

concentrating tracking solar collectors for solar heating plants. Sunarc A/S produces antireflection treated glass for a large number of Europe's leading solar collector manufacturers.
