Outdoor power station factory in Sudan

Overview

What is power in Sudan?

Power in Sudan Sudan is a country with immense renewable energy potential, possessing a high hydropower potential based totally on its location on the river Nile and other watersheds, a high wind speed mainly in its northern and western region, and high solar radiation throughout the country.

Where will Sudan's first wind power plant be located?

Sudan has advanced a major step in developing its first wind power plant with the arrival of the wind turbine to be located in Dongola in the northern state, as part of the UNDP's wind energy project in the country.

How many hydropower plants are there in Sudan?

The total potential for hydropower in Sudan is estimated at 4,860 MW, with an annual production of 24,132 GWh. Sudan has five hydropower plants with a total capacity of 1923 MW . Table (2) below shows the hydropower plants in Sudan with their characteristics.

Will Sudan face an energy problem in the future?

In December 2014, the United Nations Development Programme (UNDP) warned that Sudan could face an energy problem in the future, if it does not set up alternative power solutions, mainly because of the rapid growth in energy demand .

Does Sudan have a problem with electricity supply?

Sudan is currently facing a major problem with electricity supply. According to the report " Tracking SDG 7: The Energy Progress Report (2021) ", only 54% of the population in Sudan have access to electricity; this indicates more than 20 million people aren't connected to the national electricity grid .

What is Sudan's first wind turbine?

Sudan's first wind turbine is 63 m-tall and is expected to produce 100 MW of affordable clean energy to provide power for at least 14,000 people in Sudan's northern state . Figure 2: Sudan first wind turbine traveling to wind farm site in Dongola. Hydropower in Sudan
