

SolarGrid Energy Solutions

Outdoor power supply with self-charging

Overview

Why should you buy a portable power station?

Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

What is a portable power station?

A portable power station is like a big, rechargeable battery that you can take anywhere. It's handy for camping, outdoor events, or as a backup power source at home. You can plug in various devices like phones, laptops, and even small appliances to keep them running when there's no traditional power source available.

Which battery is best for a portable power station?

These days most portable power stations, including all those we recommend here, use LiFePO4 batteries, which are capable of holding far more cycles, which is the number of times a battery goes through a complete discharge and recharge, than older lithium-ion batteries while also being less likely to combust.

How do portable power stations work?

Portable power stations have control panels with LED displays and buttons that turn off and on inputs and display usage and remaining power. Most portable power stations are also compatible with Bluetooth and Wi-Fi, allowing you to monitor and control them remotely from a smartphone app.

How long does a portable power station take to recharge?

That depends on the capacity of your portable power station, the wattage of your solar panels, and the weather. For example, a 1,000Wh power station that's receiving a consistent stream of 200 watts of power from a solar panel would take about 5 hours to recharge ($1,000/200=5$). Are portable power

stations weather resistant?

.

Can you go off the grid with a portable power station?

You may go off the grid, but that doesn't mean you can't be connected. Power your devices anytime, anywhere with an OffGrid portable power station from Schneider Electric. Options available in 300W (PPS330), 500W (PPS500), and 700W (PPS730) models, which all provide clean, pure sinewave power.
