Outdoor wireless AP base station settings

Overview

Is TP-Link a good wireless base station?

TP-LINK's 5GHz 300Mbps * Outdoor Wireless Base Station is specifically designed to provide an effective solution for outdoor wireless networking applications. With its centralized management platform and high degree of flexibility, it is the ideal choice for providing point-to-point, point-to-multipoint, and outdoor Wi-Fi coverage.

Are outdoor access points a good idea?

Outdoor access points are a great way to extend your wireless network to a farther distance. You can save a lot on installing new infrastructures and running new cables. For outdoor deployments, an access point that is fully against dust and water ingress is needed.

Should APS be mounted on a pole?

Pole mounting is a good option when installing the APs away from the buildings, which is more common in a wireless mesh system where no cables need to be pulled to each location. It's ideal for providing a 360° overall coverage for your premises, but if the access point is mounted too close to the pole, the RF will be severely attenuated.

How do I remove a wireless access point from a wired access point?

Includes details such as the downlink Access Point (by specified name or MAC address), signal strength, and the option to remove the wireless Access Point from the wired Access Point by clicking remove. Note: Downlinks will only be visible under the Details tab when a wireless Access Point is connected.

How do I connect a wireless access point to Unifi controller?

Access Point - Isolated When an Access Point is in an Isolated state, a connection to the UniFi Controller software can be reestablished by reconnecting the Access Point to the router or by establishing a wireless

uplink to a wired Access Point. See “Wireless Uplinks” on page 32 to find, select, and connect to a wireless Access Point.

What are the different types of outdoor AP installation options?

There are basically four options in outdoor AP installation: wall mounting, pole mounting, corner mounting and roof mounting.
