Outdoor wireless network base station

Overview

What is TP-Link outdoor wireless base station?

TP-LINK's 2.4GHz 300Mbps Outdoor Wireless Base Station is specifically designed to provide an effective solution for outdoor wireless networking applications. With its centralized management platform and high degree of flexibility, it is the ideal choice for providing point-to-point, point-to-multipoint, and outdoor Wi-Fi coverage.

Does wbs510 work with TP-Link?

Two external RP-SMA antenna interfaces allow the Outdoor Wireless Base Station to integrate seamlessly with TP-LINK's line of sector and dish antennas. Where long- distance wireless data transmission is necessary, the WBS510 can be paired with a TP-LINK dish antenna, allowing it to transfer data over distances of up to 50 km *.

Can the wbs510 be paired with a TP-Link dish antenna?

Where long- distance wireless data transmission is necessary, the WBS510 can be paired with a TP-LINK dish antenna, allowing it to transfer data over distances of up to 50 km *. Pharos Base Stations works seamlessly with TP-LINK dish and sector antennas to provide efficient PtP and PtMP data transmission.

Can a wbs210 be paired with a dish antenna?

Where long- distance wireless data transmission is necessary, the WBS210 can be paired with a TP-LINK dish antenna, allowing it to transfer data over distances of up to 30 km. Pharos Base Stations works seamlessly with TP-LINK dish and sector antennas to provide efficient PtP and PtMP data transmission.

What makes the Pharos series a good base station?

To maximize performance and stabilize long distance wireless transmission, the Pharos Series is built with Qualcomm Atheros enterprise level chipsets,

high gain-antennas, and high-power amplifiers. In addition to excellent internal components, Pharos Series Base Stations also feature specially designed, weatherproof enclosures and PoE capability.

How can wireless operators improve network performance?

Wireless operators everywhere are being challenged to add capacity and boost network performance to maintain a competitive advantage. Adding new macro cell sites and modernizing existing sites are key strategies to addressing these challenges, but there is no one-size-fits-all solution.
