PV Energy Storage Subsidy 2025

Overview

A total of PLN 4 billion (\$1 billion) will be distributed under the subsidy scheme by the end of 2025 in a bid to bring online more than 5 GWh of energy storage projects by 2028. From ESS News

What are Energy Trust's solar and battery storage incentives for 2025?

Energy Trust is pleased to announce preliminary* solar and battery storage incentives for 2025. Energy Trust plans to allocate over \$14 million to support the installation of new solar and paired battery storage systems, early development and design assistance, community solar and community resilience.

How much PLN will be distributed under the energy subsidy scheme?

A total of PLN 4 billion (\$1 billion) will be distributed under the subsidy scheme by the end of 2025 in a bid to bring online more than 5 GWh of energy storage projects by 2028. From ESS News.

How much money will Energy Trust spend on solar projects?

Energy Trust plans to allocate over \$14 million to support the installation of new solar and paired battery storage systems, early development and design assistance, community solar and community resilience. The budget will also support new incentives for emerging opportunities in our market such as project financing.

What is Poland's energy storage subsidy program?

From ESS News Following a public consultation launched in July 2024, the Polish Ministry of Climate and Environment has finalized its energy storage subsidy program which aims to support the deployment of more than 5 GWh of energy storage in the country. The new regulation was published in the Journal of Laws of the Republic of Poland on March 7.

Why does Germany need a solar-plus-storage subsidy?

That compares to the effective 100% requirement that solar-plus-storage projects used to need in order to qualify for an investment tax credit (ITC) in the US, and still do for Germany's Innovation Tender. The subsidy is needed because BESS co-located with PV are 'not profitable', the government said.

How much does a kWh subsidy cost?

The initial estimate for the subsidy is €0.14-29 per kWh of energy discharged. Independent research and consultancy organisation CE Delft has been heavily involved in the analysis of the scheme until now.
