

# **Palestine Communications Green Base Station Photovoltaic Power Generation Tender**

## Overview

---

Does Palestine have a potential for solar power?

The Palestinian territory has a high potential for solar power generation, as it receives around 3,000 hours of sunshine per year. As a result, the Palestinian Authority is looking to attract investments in the renewable energy sector. Inauguration of the solar power plant in a school in Beit Hanina, Jerusalem.

How much PV power can be produced in Palestine?

In Palestine, the average values of specific PV power production from a reference system, described in Table 2, vary between 1700 and 1765 kWh/kWp for the selected three areas. A maximum value of energy that can be produced in Gaza and in the very southern region of the West Bank is higher than 1800 kWh/kWp.

How does Palestine support the uptake of renewables?

Palestine has introduced several schemes that support the uptake of renewables, such as a FiT scheme, a net metering scheme, and a licensing (or “direct offer”) scheme, while a tender scheme is in the preparation stage.

Where is electricity supplied in Palestine?

Table 1: Sources of Electricity in Palestine Based on Yearly Consumption (PCBS 2019). The West Bank is mainly supplied by three 161/33 kV substations: one in the south close to Hebron; another one in the central West Bank, near the town of Salfeet, close to Nablus; and a third in the northern part of Jerusalem.

Why is energy demand so high in the Palestinian territories?

Energy demand in the Palestinian territories is growing rapidly while the availability of natural resources is scarce, making the power sector almost entirely dependent on energy imports from neighboring countries.

What is the energy problem in Palestine?

Inauguration of the solar power plant in a school in Beit Hanina, Jerusalem. The energy problem in Palestine is one of many issues that affect the social and economic conditions of the Palestinian people. The fact that most of the energy is imported at relatively high prices places more financial burdens on poor and marginalized people.

## Palestine Communications Green Base Station Photovoltaic Power

### China's Largest Single-Capacity PV Power Plant Built on Coal ...

Nov 6, 2024 · The power station has an installed capacity of 3 million kilowatts, with over 5.9 million photovoltaic panels installed. The power station site hosts the country's first large-scale ...

## Latest Tenders From Palestine
