What is the storage capacity of Lake Palestine?

According to the Texas Water Development Board 2012 Survey, the storage capacity of Lake Palestine is 367,312 acre-feet with a surface area of 23,112 acres at the conservation pool elevation of 345 feet above mean sea level. The drainage area above the dam is approximately 839 square miles.

How much does a battery storage system cost?

Around the beginning of this year, BloombergNEF (BNEF) released its annual Battery Storage System Cost Survey, which found that global average turnkey energy storage system prices had fallen 40% from 2023 numbers to US\$165/kWh in 2024.

Will a 60% tariff increase energy storage costs?

“What we found is that with the 60% tariff, the cost [of a turnkey energy storage system] increases by 60% compared to 2025, so this is quite a big cost jump if the US actually decided to do so,” Kikuma says.
