

SolarGrid Energy Solutions

Panama Colon Direct Plug-in Solar System

Overview

How do solar panels work in Panama?

They are composed of numerous solar cells made from semiconductor materials like silicon. When sunlight hits these cells, it excites electrons, creating an electric current that can power Panama homes. Moreover, with a new 48V battery and large inverters, you can also power your air conditioning, pool pumps, and refrigerator.

Are solar panels a good option for a Panama home?

It's the best option for maintaining power during grid outages while lowering your electric bill. No permits are needed. While solar panels illuminate your Panama home, solar poles can light up your neighborhood, so we recommend considering them as well. They operate off the grid and don't incur any electricity costs.

Where to buy solar equipment in Panama?

You can buy solar equipment tax-free from local dealers in Panama. However, their stock might be a bit outdated. Purchasing directly from reputable solar companies on Alibaba or AliExpress is a better option. Shipping takes about three months, but you save around 50% and avoid importation and sales taxes with a simple application.

Does Panama have a solar system?

In addition, Panama's grid system operates on a split-phase setup, similar to that in the United States. When ordering your inverter, ensure it is compatible with this system, as different versions are available. This compatibility ensures your solar system functions effectively with Panama's electrical infrastructure.

How can Panama improve solar power adoption?

Finally, schedule inspections to ensure compliance with local building codes

and safety standards. Panama's Law 417, effective in 2024, exempts everyone from importation and sales taxes on solar products, including batteries, to boost solar power adoption.

How long do solar panels last in Panama?

Opt for lithium-ion LiFePO4 batteries, which can last up to 10 years without replacement, unlike lead or gel batteries, which typically last only about two years in Panama's climate. Deciding whether to install solar panels yourself or hire a professional contractor is critical.
