

**SolarGrid Energy Solutions**

# **Partition electricity sales and energy storage China Southern Power Grid**

## Overview

---

Does China have a power grid?

China has two major national power generation and transmission utilities -- State Grid Corp of China and China Southern Power Grid. State Grid covers about 26 provinces in eastern, central and northern regions, while the latter covers five provinces in southern China.

What power sources does CSG use?

With the grid spanning nearly 2,000 kilometers from east to west, CSG is connected to various power sources, including hydro, coal, nuclear, gas, wind, solar, biomass, pumped storage, and new energy storage.

When did China's Southern regional power market start?

China's southern regional power market started trial operations in the week of July 18. Grid operator China Southern Power Grid said on its social media platform that the launch marked the first implementation of the national power market system in the southern provinces.

What will China Southern power grid expect in 2022?

China Southern Power Grid expects cumulative market-based electricity trades in the southern power market to reach 1.11 trillion kWh in 2022, close to the total electricity consumption of the three provinces of Guangdong, Yunnan and Guizhou in 2021.

Where is CSG's power grid located?

CSG's power grid covers the five provincial-level regions in southern China and is connected to the power grids of Hong Kong and Macao SARs, as well as Southeast Asian countries, with a power supply area of one million square kilometers, serving a population of 272 million.

How many provinces does China have a state grid?

State Grid covers about 26 provinces in eastern, central and northern regions, while the latter covers five provinces in southern China. Guangdong is China's largest power consuming province, with 786.663 billion kWh of demand in 2021, accounting for about 9.5% of the country's total of 8.31 trillion kWh, official data showed.
